

AgriNET In-Canopy

Field Telemetry Unit

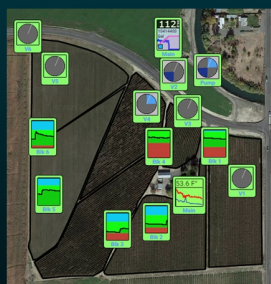

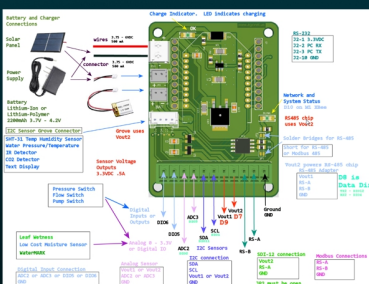

Base unit includes $\pm 0.2^{\circ}\text{C}$ Temperature and $\pm 2\%$ Relative Humidity sensor with 5 minute data interval. Telemetry unit has very small footprint in field (6"x4"x3") to avoid damage.

Additional Sensor Options: Sentek SDI-12 Soil Moisture Probes

Soil Vacuum, Leaf Wetness, Pressure Switch, Pressure Transducer, Rain Bucket, IR, CO2, WaterMark or any sensors that use the following protocols: I2C, SDI-12, Modbus 485, Digital Input and Analog Input.
